- Operating Systems:** Unix, Mac OS X, Windows (XP, NT4, Windows 2000 -2003)
- Current Projects**
- Built blog features into my website, such as comments, categorizing, clean url's, and an admin section to manage the website. Actively being developed.
 - Created a client portfolio website for a film, music video, commercial director.
- Experience**
- Self Employed Web Developer, Greater Los Angeles, CA
Manage linux servers. Work with Codeigniter, PHP web application framework, or similar when creating websites. Work consists of creating and/or editing designs, creating XHTML and CSS layouts, creating web applications using PHP, and advanced client side interfaces using javascript and JSON.
(02/08-Present)
- ExtractValue, Arcadia, CA
Web Developer Intern: Created, maintained, and updated several websites/apps using Codeigniter the web application framework. Integrated websites/apps through an api of an application created internally. Required Knowledge: PHP, MySQL, CSS, XHTML, Javascript, SVN.
(02/08-08/08)
- SoCal Sanitation, El Monte, CA
Web Developer: Responsible for creating, maintaining, and updating the website. I use Div layouts for the content and CSS for the design. I used jquery for some effects and developed a backend with php.
(12/07-12/08)
- Freelance Computer Support, Various Locations, CA
IT Support: Installed PC hardware and software, maintained computer systems, setup home networks, built custom PC's, troubleshoot and/or replaced hardware, software, and operation systems. Consulted.
(/99-01/07)
- United Parcel Service, Baldwin Park, CA
Bulk Driver: Memorized the majority of United States zip codes used to determine where the packages go using those zip codes, and the movement of large (over 70lbs) and irregular packages throughout the building.
